

# ORDER IN YOUR COURT

## Comprehensive Case Management for Accountability Courts

Feeling overwhelmed? Tracking participant progress is more complicated than it used to be. Preparing for team meetings can be exhausting, and the meetings themselves can feel like putting together a jigsaw puzzle. As your court grows, an accountability court case management system is a must.

Accountability Court Case Management

Judges

Program Coordinators

Treatment Providers

Case Managers

Prosecutors

Public Defenders

Compliance Officers

## Keep track of what's most important

You want to hold your court's participants accountable. FivePoint will help you do just that. With a single access point, we increase your court's efficiency by offering:

- Cross-referencing capabilities to identify eligible offenders
- Real-time management of participant events and treatment
- Prompt email notifications regarding non-compliance
- Seamless integration with drug labs, assessment tools and other agencies

## Keep all of your people on the same page

Real-time data greatly reduces the prep time often required for your team meetings. When one administrator updates a participant's entry, the entire system is informed. You'll save time with:

- Bar-coded documents generated on demand
- Most current treatment event and court status for every participant
- Robust reporting tools
- Fewer errors or duplicate entries

## Build your court's momentum

We free you from administrative headaches, allowing you to focus on participant success. When tracking, measuring, and reporting capabilities improve, federal and state grant providers take notice, and your program grows.

## Let Us Guide You

Leveraging technology can be a challenge. But things don't have to get worse before getting better. FivePoint Solutions is a tech company that hasn't forgotten why it exists. We make people's lives EASIER by helping them work SMARTER.
